- Problem Solving

- Eager to achieve goals &
  work hard towards them

- Works well in both teams and
  individually.

- Enthusiastic to learn new skills

- Verbal & written communication

- Reliable in the workplace

PERSONAL STATEMENT

After recently graduating from university in Games Computing and Technology I am seeking opportunities to enhance my technical experience. I'm eager to develop and learn new skills that help further my knowledge, and would regard myself a quick learner. Whilst I haven't worked in the industry yet, I have previously worked with the public which refined my skills of communicating and working as part of a team. I feel my combined experiences of university and previous employment make me ready to enter the industry.

EDUCATION

ANGLIA RUSKIN UNIVERSITY
2017 - 2020

BSc (HONS) COMPUTER GAMING TECHNOLOGY – 2:1

My time at university helped me gain key skills that can be vital in the work place. I furthered my communication skills with peers and professors when needing help find solutions to problems, and also gave presentations, some to professionals in the field, which helped me gain valuable public speaking experience. Handling multiple projects at the same time helped me develop my time management skills, and ensuring I handed in high quality work at a strict deadline that lead me to a 2:1.

SUFFOLK ONE SIXTH FORM
2015 - 2017

A-LEVEL:
Game Design - Distinction*
ICT - Distinction*
Mathematics - D

ALDE VALLEY HIGH SCHOOL
2011 - 2015

GCSE'S:
8 GCSEs
Grade A-C,including Maths and English

OTHER EXPERIENCE

GAME JAMS

I have taken part in numerous game jams both individually and in a team. I always found that they were a great way to practice something new and explore new creative solutions. A notable project consisted of a small team with three programmers and one artist, and it helped me understand working in a team environment. I managed delegating tasks between programmers whilst also communicating and managing time to ensure we hit the deadline.

LIFEGUARD
Leiston Leisure Centre | 2015 - 2019

When becoming a lifeguard we are taught how to effectively work as a team, but also take initiative and make quick decisions individually. I would frequently work with diverse range of different customers, and effectivly communicate so I could assist them with a variety of different needs. As well as this, I have experience working in a team to ensure customer safety which I strengthened during routine training exercises to ensure that as a team we can work through any potential issues.
